The Professional & Revolutionary Lithium-ion Battery
CHEWING GUM REMOVAL
system

 MADE IN BRITAIN

The Professional & Revolutionary Lithium-ion Battery **CHEWING GUM REMOVAL** system

Providing a Eco Friendly solution to chewing gum removal

A comfortable self contained lightweight backpack is worn by the operative allowing for complete freedom of movement, allowing the operator to remove discarded gum from any surface in seconds, including, Tarmac, block paving, natural stone, concrete, wood and even matting.

The unit is attached to an ergonomic lightweight lance designed specifically to ensure fast, reliable and easy operation with maximum chewing gum removal. The clever pump injects the exact amount of Eco Friendly solution into the lance which provides a constant source of vaporised solution at the point of contact. A PH Neutral and Safe steam mixture vaporises the chewing gum, which can then be brushed away. The combination of heat and specially designed Eco Friendly detergent means that a wad of gum can be removed in just a matter of seconds - one cleaning operative can remove many pieces of gum per hour with no disruption to the public.

The Ecogum machine eliminates the need for high pressure hoses, unfriendly chemicals and over-spray into unwanted spaces, making it highly suitable to work in both populated and busy areas. The high quality and robust design of the **Ecogum Max-e** and the flexibility of a inter changeable Lithium-ion battery means it has a continuous operating cycle of a minimum 80 minutes per battery.

BENEFITS OF OUR TECHNOLOGY:

- No external power source required.
- No water spray - So there's not gallons of water everywhere!
- No trailing leads causing a tripping hazard or noisy generators
- No blowing sand out of joints - So no rivers of sand or dislodged, uneven pavers
- No need to barrier off areas for storage, everything is self-contained in the backpack
- No damage to surfaces from power-washing
- Completely silent - cleaning operations can be carried out at night.
- Portable and safe - cleaning can also be carried out during busy times, generating great positive PR and press coverage.
- Environmentally friendly - our unique cleaning solution is manufactured from renewable sources and is based on a sugar surfactant rather than oil based making it completely bio-degradable.

THE MOST ECO FRIENDLY GUM REMOVAL TECHNOLOGY AVAILABLE

A LIGHTWEIGHT COMFORTABLE BACKPACK

HOT ECO FRIENDLY DETERGENT

ecomax^e

- Hand held controller
- Lightweight Backpack
- Extremely portable
- Hard robust ABS outer casing
- 80 minutes run time
- 1x additional battery
- Environmentally friendly
- High performance and reliability
- Made in Great Britain

Service packs are available to purchase separately

Gum E Service Pack:

- 4 x Bottles of detergent
- 2 x Eco round brush

Brushes:

We have a variety of brushes to suit your individual needs all are sold separately, please ask for more details.

Optional Durable Carry Cart:

Constructed in steel with rubber wheels and velcro fixings, offers an alternative to carrying the machine via a backpack.
